Field note — not a G4FC, whatever the displacement says

The G4FG replaced the G4FC in 2010: same 1,591 cc, but Gamma II adds dual CVVT on both camshafts and a variable-geometry intake manifold. They are not interchangeable and they are not priced the same — US\$ 490 against US\$ 340. This is the single most common mix-up on Hyundai orders, so we quote strictly off the block stamp.
