Field note — three timing chains, and what that means at the counter

The VQ35 runs three chains rather than one, with a service life normally quoted around 200,000–250,000 km. That is a selling point against a belt engine, but it also means chain and guide condition is the first thing a buyer will ask about — so it is photographed on every unit we ship, with the serial tying the photo set to the engine in the crate.
